

RAVURI ADITHYA VENKAT KUMAR

+91-8121117893 — adithyavenkato210@gmail.com — LinkedIn — GitHub

Professional Summary

Aspiring DevOps / Site Reliability Engineer with hands-on exposure to Infrastructure as Code, containerization, and CI/CD pipelines on Microsoft Azure. Skilled in provisioning and automating cloud infrastructure using **Terraform**, managing containerized workloads with **Docker and Kubernetes**, and building CI/CD workflows with **Azure DevOps, Jenkins, and GitHub Actions**. Strong foundation in **Linux system administration, Bash scripting**, and monitoring/observability using **Prometheus, Grafana, and Azure Monitor**. Passionate about automation, reliability engineering, and applying cloud-native best practices to build secure, scalable infrastructure.

Skills

Cloud Platform	Microsoft Azure, AWS
Infrastructure as Code	Terraform
Containers & Orchestration	Docker, Kubernetes
CI/CD	Azure DevOps, GitHub Actions
Monitoring & Observability	Prometheus, Grafana, Azure Monitor
Operating Systems	Linux Administration, Windows Server, Bash Scripting
Programming & Scripting	Bash
Version Control & Tools	Git, GitHub, VS Code
Databases	MySQL

Projects

1. Azure Multi-OS VM Infrastructure with Terraform 2026 [GitHub](#)

Tools: Terraform, Microsoft Azure, Azure Key Vault, Virtual Machines, VNets, Subnets, NSGs, NICs, Public IPs, Azure CLI

Description: Designed and deployed a modular Terraform infrastructure solution for provisioning Linux and Windows Virtual Machines on Microsoft Azure, including networking, security, and reusable infrastructure modules.

Role: Worked as a DevOps Engineer responsible for infrastructure provisioning, Terraform module development, Azure security, credential management, and deployment automation.

- Designed and implemented **10 reusable Terraform modules** for Azure Virtual Machines, networking, NSGs, NICs, subnets, and public IPs.
- Integrated **Azure Key Vault** for secure VM administrator credential management, eliminating hardcoded secrets from configuration files.
- Implemented **map-based, data-driven Terraform configurations** to provision multiple resources from reusable object definitions.
- Documented complete Terraform workflows including **init, validate, plan, apply, and destroy** with Azure CLI authentication.

2. Email Spam Detection System 2025 [GitHub](#)

Tools: Python, Flask, NumPy, Pandas, Scikit-learn, Naive Bayes

Description: Developed a machine learning-based email spam detection system using Python and Flask to classify emails as spam or legitimate messages, achieving over 92% classification accuracy.

Role: Worked as a Machine Learning Developer responsible for data preprocessing, model development, evaluation, and Flask application integration.

- Preprocessed and analyzed email datasets using **Python, NumPy, and Pandas** for model training.

- Implemented a **Naive Bayes classifier** to identify spam and legitimate emails with over **92% accuracy**.
- Developed a **Flask-based web application** to provide an interface for real-time email classification.
- Evaluated model performance and integrated the trained model into the application for automated predictions.

Education

M.Tech (Integrated) - Computer Science and Engineering **2021 – 2026**
Vellore Institute of Technology - AP - CGPA: 7.83 *Amaravati, India*

Narayana Junior College, Andhra Pradesh **2021**
Intermediate (MPC) - CGPA: 6.94 *Guntur, India*

Oxford IIT School **2019**
Secondary School (SSC) - CGPA: 9.0 *Guntur, India*

Certifications

- Oracle Cloud Infrastructure 2024 Generative AI Certified Professional [Badge](#)
- Certificate of Volunteer – Engineering Clinics Expo (Fall 2022–23)- VIT-AP University [Badge](#)
- Marketing Member at Pennify Chapter VIT-AP University [Certificate](#)

LANGUAGES

English — Telugu — Hindi

Hobbies

- Playing Basketball
- Drawing
